

# Freelance Book Marketplace

Presented By:

Mohammad Masudul Alam-011 172 034

Jadir Ibna Hasan-011 172 089

Khalid Saifullah-011 172 043

# Project Description

- In this project we are going to develop a website where book lovers can rent or buy books from sellers.
- Anyone with books can be a seller.
- Users will be properly authenticate
- Each seller/lender will have ratings.
- Buyers will be able to avail COD service.

# Motivation

- In Bangladesh there is no website/app which provides freelancing in book related service. If we see from a readers point of view we often see many book enthusiastic people can't read books simply just because of money shortage so there's come the idea of our project.
- By our project book enthusiastic people will be able to read books frequently by lending from others with a very small amount of money, those who are capable of buying books can buy books from sellers.
- By our project book lovers will have a chance to earn extra money by lending books to others.
- Most importantly it will help our readers community become more strong and help us build a society full of productive, creative and wise minds.

# Benchmark Chart

Features	Rokomari.com	Boibazar.com	Eboighar.com	Our Project
Freelancing	No	No	No	Yes
Easy Navigation	Yes	Yes	Yes	Yes
Search By Author/Title/Publication/ISBN/Genre	Yes (Title,Author,Publication)	Yes (Title,Author,pub lication,Genre)	Yes (Title,Author,Pub lication)	Yes (Title,Author,Pub lication,ISBN,Ge nre)
User Authentication	Yes	Yes	Yes	Yes
Sellers/Lenders rating	Yes	Yes	No	Yes
Synopsis of novels	No	No	No	Yes

# Freelancing

- This is the most amazing feature in our project. None of the mentioned website have this feature.
- Every single websites are book selling website thus they don't have any freelancing scope.
- In our project we will provide book rent service as well as book selling.
- Anyone with their own book collection can become a lender/seller, there comes the idea of freelance.
- With this feature we think our project will become very popular within a very short time over other websites as the readers can avail both rental and buy service in a single place.

# Easy Navigation

- Rokomari.com, Boibazar.com, Eboighar.com almost every website is pretty much easy to navigate.
- Boibazar.com and Eboighar.com are slightly overwhelming to navigate.
- Our target will be to do better navigation than that of above mentioned websites.
- By applying easy navigation we might get one step ahead than mentioned websites as our goal is to put customers at ease.

# Search By Author/Title/ISBN/Publication/Genre

- In rokormari.com visitors can search by Title/Author/Publication which helps visitors to find book easily.
- In Eboighar.com visitors can search by Title/Author/Publication which is same as rokomari.com.
- In Boibazar.com visitors can search in a similar fashion (Title/Author/Publication) like both rokomari.com and Eboighar.com but with an extra option “Genre” which helps users to find books of their favorite genre.
- In our project, visitors will be able to search by Title/Author/Publication/ISBN/Genre which takes us one step ahead of our market competitors by adding robust searching criteria.

# User Authentication

- To make a secure and spam free platform we'll add user authentication
- Every time a user enters the platform, they'll go through proper authentication process
- Passwords will be hashed before saving to the database as a cybersecurity measure
- As the platform would be quite interactive, this feature would allow for the users feel secured

# Seller/Lender Ratings

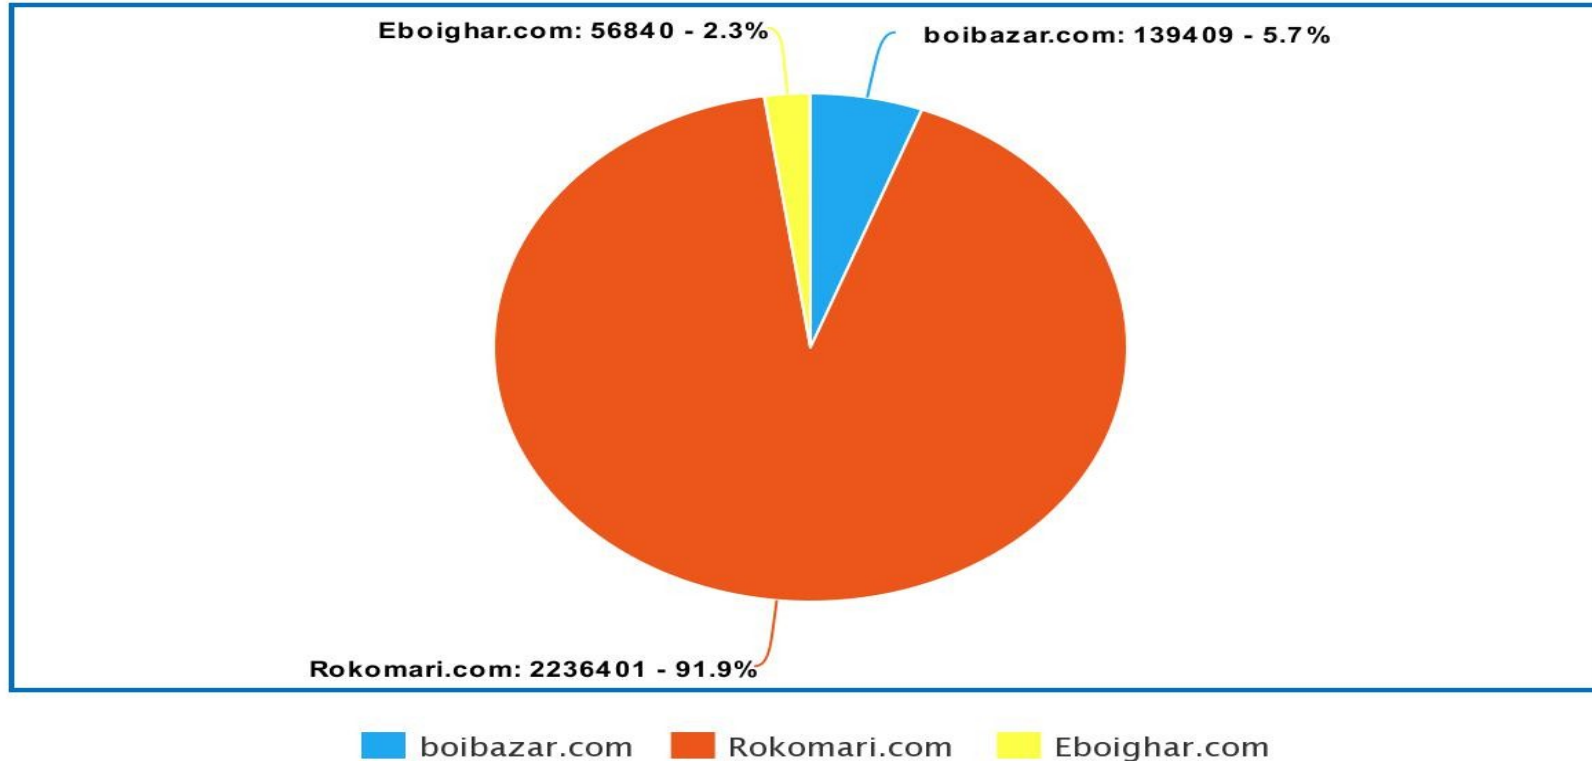

- Rokomari.com has rating system for seller on the other hand Boibazar.com and Eboighar.com don't have this feature which puts the Rokomari.com in better position than rest of the compared websites.
- In our project we will give this feature so that visitors can see sellers/lenders rating and have their faith in them before renting/buying a book.
- By adding this feature we hope we will be in a strong position than Boibazar.com and Eboighar.com and compete with Rokomari.com.

# Synopsis Of Novels

- This is another interesting unique feature in our project.
- When we want to read a novel most of us wants to read the synopsis of the book (not spoiler) so that we can check if that interests us.(Similar to checking plots of movies)
- None of our competitors have this feature.Rokomari.com and Boibazar.com have a feature which only allows people to read first one or two pages but doesn't provide the synopsis.
- By adding this feature we think book lovers will have more precise idea what is it they are going to read and won't get disappointed after finishing it.
- Again by adding this feature we think we will be one step ahead of our competitors.
